

# POWER SOUTH NEPEAN

You're invited to Community Information Centre #3  
Project Update and the Preferred Route

## Power South Nepean

In 2017, Hydro Ottawa Limited (Hydro Ottawa) and Hydro One Networks Inc. (Hydro One) initiated a Class Environmental Assessment (EA) study for new electricity transmission facilities to power ongoing growth in South Nepean. The proposed facilities would include a new Hydro Ottawa municipal transformer station (MTS) and a new 230 kilovolt (kV) transmission line to connect the MTS to Hydro One's existing 230 kV transmission system at West Hunt Club Road. To achieve the connection, Hydro One is proposing to upgrade its existing single circuit 115 kV transmission line to a double circuit 230 kV transmission line within the existing corridor from West Hunt Club Road to Cambrian Road, and to construct a new 230kV transmission line along Cambrian Road to the new MTS, west of Highway 416.

## The Preferred Option and New Municipal Transformer Station Location

Following field and technical studies, including consultation with community members, several transmission route options were identified. These options were presented at the second Community Information Centre (CIC) held in August 2018. More information on these route options can be viewed at [powersouthnepean.com](http://powersouthnepean.com).

Based on feedback received after the August CIC, a preferred option was identified for the transmission route and MTS location. The preferred option is to place the MTS along Cambrian Road (west of Highway 416) and to connect it to the transmission line at Cambrian Road and Moodie Drive. The preferred option is shown on the map above.

Please note: Under the *Freedom of Information and Protection of Privacy Act* and the *Environmental Assessment Act*, unless otherwise stated in the submission, any personal information such as name, address, telephone number, and property location included in a submission will become part of the public record files for this matter and will be released, if requested, to any person.

## We welcome your input

You are invited to drop into our upcoming Community Information Centre. Members of our project team look forward to updating you on the project and discussing the preferred option with you.

### Please join us on:

**Wednesday, November 14, 2018**

6:00 p.m to 8:00 p.m

St. Patrick's Parish

15 Steeple Hill Crescent, Nepean

*(Hall is located behind the parish, accessible via a road south of the parish)*

## Next Steps

Following the CIC, Hydro Ottawa and Hydro One will release a draft Environmental Study Report (ESR). There will be an opportunity to provide comments on the draft ESR and you will receive a notice in the near future with more information.
